## About AR Energy

- Trusted Solar and Battery Specialists:**

AR Energy is an Australian-owned and operated company delivering tailored solar and battery solutions to residential and commercial clients. From Solar PV system design and installation to battery storage, off-grid systems, and EV charging solutions – we create energy systems that suit real needs and deliver lasting value.

- Proven Experience:**

With a leadership team offering over 60 years of combined experience in renewable energy, our qualified electricians take pride in designing, installing, and maintaining systems with precision, honesty, and a strong focus on performance. Every project reflects our commitment to quality workmanship, reliable products, and an outstanding customer experience. AR Energy also maintains all required insurances, ensuring peace of mind and full compliance on every job.

- Dedicated Project Management:**

Every project is led by an Install Manager as your single point of contact, backed by a skilled team of electricians, apprentices, and support staff to ensure smooth delivery and consistent quality.

## Our Accreditations & Certifications

We uphold the highest standards through industry-recognised certifications and our commitment to the New Energy Tech Consumer Code, ensuring quality, sustainability, and trusted renewable energy solutions.

## Quality, Health & Safety

### Quality Assurance

- High Standards:** Commitment to safe, high-quality, and efficient installations
- Accredited Oversight:** SAA-accredited management team using proven protocols
- Equipment Safety:** Regular inspections of safety gear, ladders, and vehicles
- Regulatory Compliance:** Fully aligned with State and Federal safety regulations
- Risk Management:** Strong systems and procedures to minimise risk
- Continuous Improvement:** Ongoing training and upskilling for all staff

### Trained & Experienced Team

- Installation Experts:** Skilled professionals in solar and battery installations
- Safety First:** Strong focus on safety, integrity, and communication
- Zero Accidents:** JSA and SWMS completed before every job
- Industry Ready:** Ongoing training to align with evolving standards
- Compliance Oversight:** Dedicated manager for training and certification
- Strong Team Culture:** Built on trust, communication, and continuous improvement
- Risk Management:** Experts in safe work practices and on-site risk control
- Product Preparedness:** All new products tested in-house, with full installer training

### Qualified Solar Designers

- SAA Accredited:** Certified in Solar Design and Installation
- Battery & Off-Grid Ready:** Endorsed for battery storage and off-grid systems
- Formally Qualified:** Hold Certificate III in Electrotechnology
- Design Experience:** Skilled in residential and commercial system design

## AR Energy Management System

Our Management System ensures every project is delivered safely, consistently, and to the highest quality—guided by proven processes, industry compliance, and a commitment to continuous improvement. Backed by accredited professionals, we prioritise clear communication and a customer-first approach from consultation to post-installation support.

We take the confusion out of solar with straight answers, trusted advice, and unmatched residential experience

## Clear Benefits of Solar Energy for Homeowners

### Fast ROI & Real Savings

- Reduce your power bills by up to 70% during the day.
- Most homeowners see a return on investment within 3–5 years.
- Solar systems last 25+ years and come with strong manufacturer warranties.

### Proven Quality

- High-performance brands like Jinko and Sungrow, known for reliability.
- Panels degrade less than 0.4% per year, maintaining long-term efficiency.
- Optional maintenance plans and a 10-year workmanship guarantee for peace of mind.

### Expert Installation & Compliance

- Installed by licensed professionals with a proven track record in residential solar.
- Fully compliant systems with complete SAA and CEC documentation.
- Clean, tidy installations with white-glove handovers and 24/7 emergency support.

### Tailored Advice & Transparent Service

- No jargon, just honest advice to help you make confident decisions.
- Systems are custom-designed for your roof, home layout, and energy usage.
- Transparent pricing – no hidden fees or surprises.

### Support Beyond Installation

- Help switching energy retailers if needed.
- Ongoing support after install – we're with you for the long run.

## Solar Solutions

Service Area	Description
System Design & Installation	Custom-designed solar PV systems using advanced technology for peak efficiency.
Battery Storage	Store excess energy for use during outages or peak times—enhancing reliability.
Tailored Energy Plans	Solutions customised to meet energy goals: savings, off-grid, or sustainability.
Premium Products	High-quality panels, inverters, and batteries from trusted manufacturers.
End-to-End Service	Skilled team and Install Manager delivering complete service from start to post-installation support.

## Installation Process

In-home or office consultation to assess usage and roof layout; tailored system designed to suit your home and budget.

We inspect your property to confirm optimal panel and battery placement for performance and aesthetics.

If beneficial, we guide you through switching electricity providers to maximise savings.

Typical install completed in 2–4 days with power off for only one hour—coordinated to suit your schedule.

Optional batteries store solar energy for evening use, lowering peak-time costs and improving ROI.

White-glove handover with full compliance documentation, plus 24/7 emergency support and optional maintenance plans.

**AR Energy are a  
Solarquotes Platinum  
Rated Installer**

**Neil M.** 5.0

**Brilliant Install**

Sales/quoting was great - Brandon visited the site. We'd already done the research into our system requirements using SunSpot - Highly recommend the app by energy.gov.au. Installation was great - discussed with us prior to starting. Everything delivered on time. Proactive. Very clean. Very efficient. Explained the app. Everything worked once installed! Perfect job!

**Justin C.** 5.0

**Competitive Quote - good communication - Great Installers - Follow up after sales**

Friendly, price competitive, knowledgeable Sales staff (James) and installers, they turned up on time and worked solid for two days ensuring install was neat and all cables were concealed. They did a fantastic job and I would highly recommend the team from AR Energy!

**Robyn** 5.0

**Excellent Solar Provider**

From initial consultation to actual installation AR Energy were friendly, professional and sympathetic to my needs. The office staff kept me up to date with all information. The installers were so polite and aware of working within the area of a Retirement Village. They were quiet and friendly and so polite every time they had to enter my home. Definitely would recommend AR Energy for Solar. Thank you.
